

The screenshot shows the Visual Studio Code editor with a file named `test_connection.py` open. The code is as follows:

```
1 from sqlalchemy import create_engine
2
3 engine = create_engine(
4     "mysql+mysqlconnector://root:kunlun1234@localhost/collage_db"
5 )
6
7 try:
8     with engine.connect() as conn:
9         print("Connection Successful!")
10 except Exception as e:
11     print("Error:", e)
```

The bottom panel shows the 'TERMINAL' tab with the following output:

```
PS C:\Users\sakari\Desktop\CTS_Handbook> python test_connection.py
Connection Successful!
PS C:\Users\sakari\Desktop\CTS_Handbook>
```

The screenshot shows the Visual Studio Code editor with a file named `models.py` open. The code is as follows:

```
59 class Professor(Base):
60     professor_id = Column(Integer, primary_key=True)
61     professor_name = Column(String(100))
62     email = Column(String(100))
63
64
65 Base.metadata.create_all(engine)
66
67 print("DB Models created successfully")
```

The bottom panel shows the 'TERMINAL' tab with the following output:

```
